

Tejas P R

Software Engineer

Bengaluru, India • tejas.teju02@gmail.com • +91 9538632743 • [GitHub](#) • [LinkedIn](#) • [Portfolio](#) • [Google Skills](#) • [notion](#)

PROFESSIONAL SUMMARY

Software engineer with over 1.5 years of experience architecting scalable, high-performance systems and comprehensive product features. Focused on end-to-end project ownership and operational excellence. Published researcher, Springer ICICC 2024. Proven ability to bridge complex engineering challenges with business growth, making me a strategic asset for teams aiming to build resilient, future-ready products.

PROFESSIONAL EXPERIENCE

Cronlab Solutions | Software Developer | March 2025 – Present

- Re-architected a high-concurrency checkout system (Django + Redis + Celery) into a 3-tier async pipeline, cutting latency from 5–10s to 50–100ms and verifying 1,000-thread stress tests with zero overselling.
- Designed a decoupled data-sync architecture and centralized RBAC layer for a B2B marketplace, eliminating cross-service dependencies and securing 100+ API endpoints.
- Built an audit-immutable offer-negotiation engine and a 3-step bulk-lot auction wizard, successfully shipping two independent B2B trading workflows.
- Scaffolded a Turborepo monorepo from scratch with shared UI libraries and Zod validation, standardizing architecture and reducing new-app bootstrap time.
- Implemented a type-safe frontend API layer and built interactive KPI/cultivation dashboards, unifying multi-tenant data into a single operator view.
- Engineered AI agents by writing behavioral instructions in Markdown and integrating external APIs like ChatGPT to execute logic and deploying them to production.
- Built a self-healing Redis/Postgres reconciliation engine to purge orphaned reservations and implemented secure cookie-based JWT authentication to resolve XSS vulnerabilities.

PROJECTS

AI Software Engineer — Multi AI agent powered Software Engineering Platform | Turborepo, React, Vite, FastAPI, LangChain, LangGraph, RAG | [GitHub](#)

- Built an autonomous multi-agent platform using LangChain, LangGraph, and RAG that connects with GitHub to automate the end-to-end development lifecycle, including researching, planning, coding, testing, code reviewing, and PR generation agents.
- Engineered a scalable system incorporating sophisticated multi-agent workflows, enabling intelligent codebase analysis and structural implementation.
- Integrated human-in-the-loop features including interactive reasoning for planning and modifications, alongside support for custom external API keys.

TouchUp — Booking Platform for makeup artists | React.js, Node.js, Redis, PostgreSQL, Prisma ORM, Docker, TypeScript | [live](#)

- Architected a beauty-tech marketplace (Turborepo monorepo) featuring a web app, REST/WebSocket backend, and a decoupled notification worker service - with OAuth authentication integration.
- Developed an end-to-end payment system (Razorpay integration) with idempotent order creation, row-level locking to prevent double-processing, and HMAC-verified webhooks for secure transactions.
- Implemented a robust CI/CD pipeline on GitHub Actions with automated testing and load-testing, complemented by real-time chat, multi-channel notifications (BullMQ/Redis), and a secure Docker-based deployment on VPS with Cloudflare protection.

ION — Cloud Deployment Platform | Bun, Node.js, Redis, PostgreSQL, Prisma ORM, Docker, Cloudflare R2/S3, Turborepo [GitHub](#)

- Engineered a scalable Cloud Deployment Platform using a distributed microservices architecture (5 services via Turborepo) with an asynchronous, non-blocking build pipeline and Docker for isolated repository builds.
- Optimized real-time performance through high-concurrency log streaming via WebSockets/Redis Pub/Sub and a custom dynamic Edge proxy for efficient static asset delivery.
- Enhanced security and multi-tenant resource management by leveraging Prisma ORM/PostgreSQL and integrating Cloudflare R2/S3 for robust storage.

TECHNICAL SKILLS

Languages/Frameworks: React/Next.js, TypeScript, Node.js/Express, Django, Python, React Native, TailwindCSS, HTML/CSS.

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, TimescaleDB, Docker, Kubernetes, AWS, CI/CD.

Tools & Practices: Git/GitHub, System Design, Unit/Integration Testing, Agile, Turborepo, Postman, Linux.

AI Tools: Antigravity, Claude Code, codex, ChatGPT, LangChain, LangGraph, RAG.

EDUCATION

M S Ramaiah University of Applied Sciences, Bengaluru | 2020 – 2024

Bachelor of Technology, Computer Science and Engineering — CGPA: 8.08 / 10

ACHIEVEMENTS AND CERTIFICATIONS

- Published:** [Financial Fortunes: Stock Price Prediction Using LSTM](#) — ICICC Conference, Springer, 2024.
- Certified:** [100xDevs — Full Stack Web Dev & DevOps Cohort 3, 2024](#): System design, TypeScript, Docker, Kubernetes, AWS.
- Google Cloud Certified:** The Basics of Google Cloud Compute — Google Skills (May 2026) Google Cloud Certified: Introduction to Generative AI — Google Skills (May 2026) Google Cloud Badge: Arcade Base Camp May 2026 — [Google Skills \(May 2026\)](#)
